Brian and others,

As Jon has requested, I've attached the Excel version of Table 2 for your use.

Please let me know if you have any questions.

Thank you,

Terry

Brian:

Thanks for getting back to me. We were thinking we could meet with you either at your office or at our Wakefield office, whichever you prefer. Would Tuesday 6/21 at 10 am work for you? In addition to me and others from AECOM, Peter Rice from the City would also attend. Please confirm where you would like to meet.

I am out of the office this morning, but I will ask Terry Desmarais, who is working with me on this project, to forward the Excel file of Table 2 to you.

We look forward to meeting with you.

Jon

Jon,

I am available almost any time on 6/21 but am not available on 6/22.
Where were you planning to hold the meeting, or were you planning to do
it by conference call? If that date doesn't work, I am also available
on 6/23 and 6/24.

Would it be possible for you to send us the data from Table 2 in Excel
format? It would be helpful in understanding the implications of
different scenarios.

Brian

Subject: Portsmouth NH Phase 1 Piloting - Task 1.3 Flow Evaluation
Memorandum

Hi Brian:

During this morning's conference call between representatives of the City of Portsmouth, EPA, and NHDES, Michael Wagner noted that EPA was not in agreement with the findings of the dry weather flow analysis for the Peirce Island WWTF Secondary Treatment upgrade. Following some discussion on the methodology and the results that were presented in AECOM's May 23, 2011 memorandum, it was agreed that a separate review meeting should be scheduled with you and others at EPA, together with representatives of AECOM and the City, to further discuss the methodology and findings with a goal of reaching a consensus on the dry weather flows for the secondary treatment plant upgrade.

We understood that you were unable to participate in this morning's meeting, and would like to schedule this meeting with you at your earliest convenience. Would you be available next Tuesday 6/21 or next Wednesday afternoon 6/22? Please let us know, and if these dates do not fit with your schedule, please suggest alternate dates for a meeting.

We look forward to hearing from you.

Thanks and Best Regards,

Jon
